7. LENGTH OF OBSERVATION 1) 1 min 2) 3 sec		8. NUMBER OF OBJECTS two		9. COURSE E to W reversing W to E	
10. BRIEF SUMMARY OF SIGHTING Two objects like a star - size of star, color white, red and green light - one object appeared to cross flight path - 2nd object had a tail. First object faded out, 2nd object had a blue flame.				11. COMMENTS Object observed near Lockheed Air Terminal (one of the most congested air traffics on West Coast) red and green flashing lights and reversal of cours at high alt. Little doubt it was a/c. Scattered clouds in area, also, this often gave odd appearances to high flying a/c. Second object with tail evaluated as meteor.
